AI Product Engineer — Applied LLM/RAG · Full-Stack (React/TypeScript) · Eval & Safety

EDUCATION

Columbia University *New York, NY*
M.S. in Computer Science *(Machine Learning Track)* — GPA 3.96/4.0 *Sep 2025 – Dec 2026*
Relevant Coursework: Analysis of Algorithms, Applied Machine Learning, Deep Learning, Natural Language Processing, Engineering Software-as-a-Service (SaaS), Advanced Spoken Language Processing

Hong Kong Baptist University (HKBU) *Hong Kong*
B.Sc. in Data Science *Sep 2021 – Jun 2025*

EXPERIENCE

Microsoft — Software Engineer Intern *Summer 2026*
OfficePLUS AI Assistant

- Led a data investigation into why users thumbs-down an LLM assistant; showed quota/points policy — not model quality — was the dominant infrastructure-side failure driver, while content quality and latency dominated thumbs-down feedback, reframing the improvement roadmap.
- Traced a client-side stream watchdog (45→60→120s) and showed it silently killed the UI with no user-facing message, mapping a concrete UX gap to a fix; delivered a prioritized 5-item fix list.

Columbia Business School — Research Assistant *New York, NY*
Jun 2026 – Present

- Delivered demographic race labels for a VC/PE founder-diversity study, turning ∼1M raw LinkedIn records into research-ready predictions (macro-F1 **0.71** → **0.79**) with documented class-level limitations.

PROJECTS

Evidence of Life — AI Life-Tracking Web App *Startup Studio* *2026*

- Built **Evidence of Life**, a life-tracking web app with AI-assisted input classification, Google Calendar sync, and map-based place memory to surface patterns from daily behavior.
- Solo full-stack on **Supabase** (Auth, Postgres, Edge Functions) + React/TypeScript with **51** passing Vitest tests.

Oracle OS — AI Symbolic-Reflection Product *Hackathon* *2026*

- Built an AI reflection workspace combining deterministic symbolic lenses with LLM interpretation through structured prompt assembly and typed TypeScript/Express APIs.
- Designed Council mode (multi-lens synthesis) and closed-loop retention (journal → motif extraction → personalized prompts); enforced safety redirects for medical/legal/financial queries.

FlowTrack — Full-Stack Job-Search Tracker *Columbia ESaaS* *2025*

- Shipped a SaaS prototype (Rails + PostgreSQL, live Sankey funnel) that surfaces hiring-pipeline bottlenecks instead of static spreadsheets; deployed to Heroku.

PUBLICATIONS

You Wu et al. Explainable Dynamic GNNs for Predictive Maintenance in Vehicle Chassis Systems. **ACML 2025** (PMLR) — reframed an ambiguous "predict failure" request into a cost-aware AI system after stakeholder clarification.

SKILLS

Languages: TypeScript/JavaScript, Python, SQL, Ruby
AI / Product: Large Language Models (LLM), prompt design, AI-assisted UX, evaluation, safety policy
Full-Stack: React, Node.js, REST APIs, Supabase, Ruby on Rails, Tailwind, shadcn/ui, Vercel
Data / Analytics: KQL, T-SQL, DuckDB, telemetry analysis, reliability, latency analysis

HONORS & AWARDS

Kaggle Silver Medal (Top 4.2%, 2024) • **MCM Honorable Mention** (Top 20%, 2024) • **CUMCM Provincial 2nd Prize** (Top 16%, 2023) • Merit Scholarship (Top 15%)
