EXPERIENCE

Microsoft — Software Engineer Intern *Summer 2026*
OfficePLUS AI Assistant

- Owned a production data investigation end-to-end across **3 non-joinable telemetry stores** (Azure SQL + 2 App Insights tenants) under a 30-day retention constraint, correcting a leadership hypothesis with hard numbers (**97.6%** quota vs 2.4% throttle).
- Shipped changes through the full release chain (PR → rebase → Azure DevOps pipeline → signed artifact → handoff → work-item closure), closing dual-instance concurrency and input-loss bugs.
- Contributed to refactoring a concurrent streaming chat engine (React/TypeScript, WebSocket RPC) and built a probe proving **500/500** runs routed with zero cross-talk.

Columbia Business School — Research Assistant *New York, NY*
Jun 2026 – Present

- Owned a research ML pipeline end-to-end for a **962,757-row** founder roster, generating leakage-safe predictions for **419,741** no-photo profiles on shared HPC infrastructure (macro-F1 **0.71** → **0.79**) with honest limitation reporting.

PROJECTS

Oracle OS — AI Symbolic-Reflection Product *Hackathon* *2026*

- Shipped a demo-ready reflection product (React 19 + Express/TypeScript) with local auth, structured prompt assembly, and explicit safety-policy enforcement.

FlowTrack — Full-Stack Job-Search Tracker *Columbia ESaaS* *2025*

- Shipped FlowTrack (Rails + PostgreSQL, live Sankey funnel, RSpec + Cucumber) as a deployed SaaS prototype helping users identify hiring-pipeline bottlenecks.

Evidence of Life — AI Life-Tracking Web App *Startup Studio* *2026*

- Solo full-stack React/TypeScript SPA on Supabase with AI-assisted input classification and 51 passing tests.
